- Machined hot knife sealing system
- Delivers strong thin package seals
- CE approval pending
- Right-to-left product flow
- Easy access electrical control panel
- Brush backed pin perforator
- Adjustable height film inverting head and take away conveyor

Description

The SeleCTech™ Model FAL 5645 is the frugally priced, robustly built automatic wrapping machine. The machine features gentle product feed and straight line product feed that makes it ideally suited for handling a wide variety of products. The FAL 5645 features conveyor fed automatic operation and is capable of up to 30 packs per minute, plus the L-seal design provides great flexibility and quick product change. The machine will accept randomly spaced product, fed either automatically or by hand.

FAL 5645
